

Attn: Delanco Residents

With the Holidays approaching and the amount of packages that increase around this time, please keep in mind that Styrofoam is NOT recyclable and should be placed in the trash and remember to flatten your boxes to fit in the Recycling Carts.

Batteries, especially Lithium Batteries, are highly flammable and are the main cause of fires at Recycling Centers. They should be disposed of properly. This includes Greeting Cards with Batteries. To find a Lithium battery recycling drop off near you, visit:
